## ABOUT US

Top Ports has over 15 Years of successful business experience across UAE in diversity of fields, with business interest ranging from Dredging, Rec-lamation, Beach Nourishment to various type of Marine Constructions.

The organization plays a important role in the Infrastructure development of the United Arab Emirates and continues to be involved in Marine Infra-structural and Development Projects that will shape Nation's future.

# VISION AND MISSION

## **Our Vision**

Our Vision is to be leaders in our diverse businesses, in area we operate.

## **Mission**

We are dynamic multi-discipline company, we strive to achieve strong returns on investments and long term growth, providing the highest integrity service standard to our clients and ensuring career opportunities to our employees.

## **Core Values**

- Our Employees are our assets
- Team Work
- Integrity
- Professionalism
- Customer Services
- Transparency
- Health and Safety Environment

## SERVICES OVERVIEW

Top Ports & Marine Contracting specializes in Marine Construction, dredging, discharging services such as capital dredg-ing, reclamation, stockpiling, maintenance dredging, trench dredg-ing and backfilling activities. Other services that we provide are:

- Survey Activities (Hydrographic and Bathymetric)
- Marine Transportation.

## SERVICES AND EXPERTISE

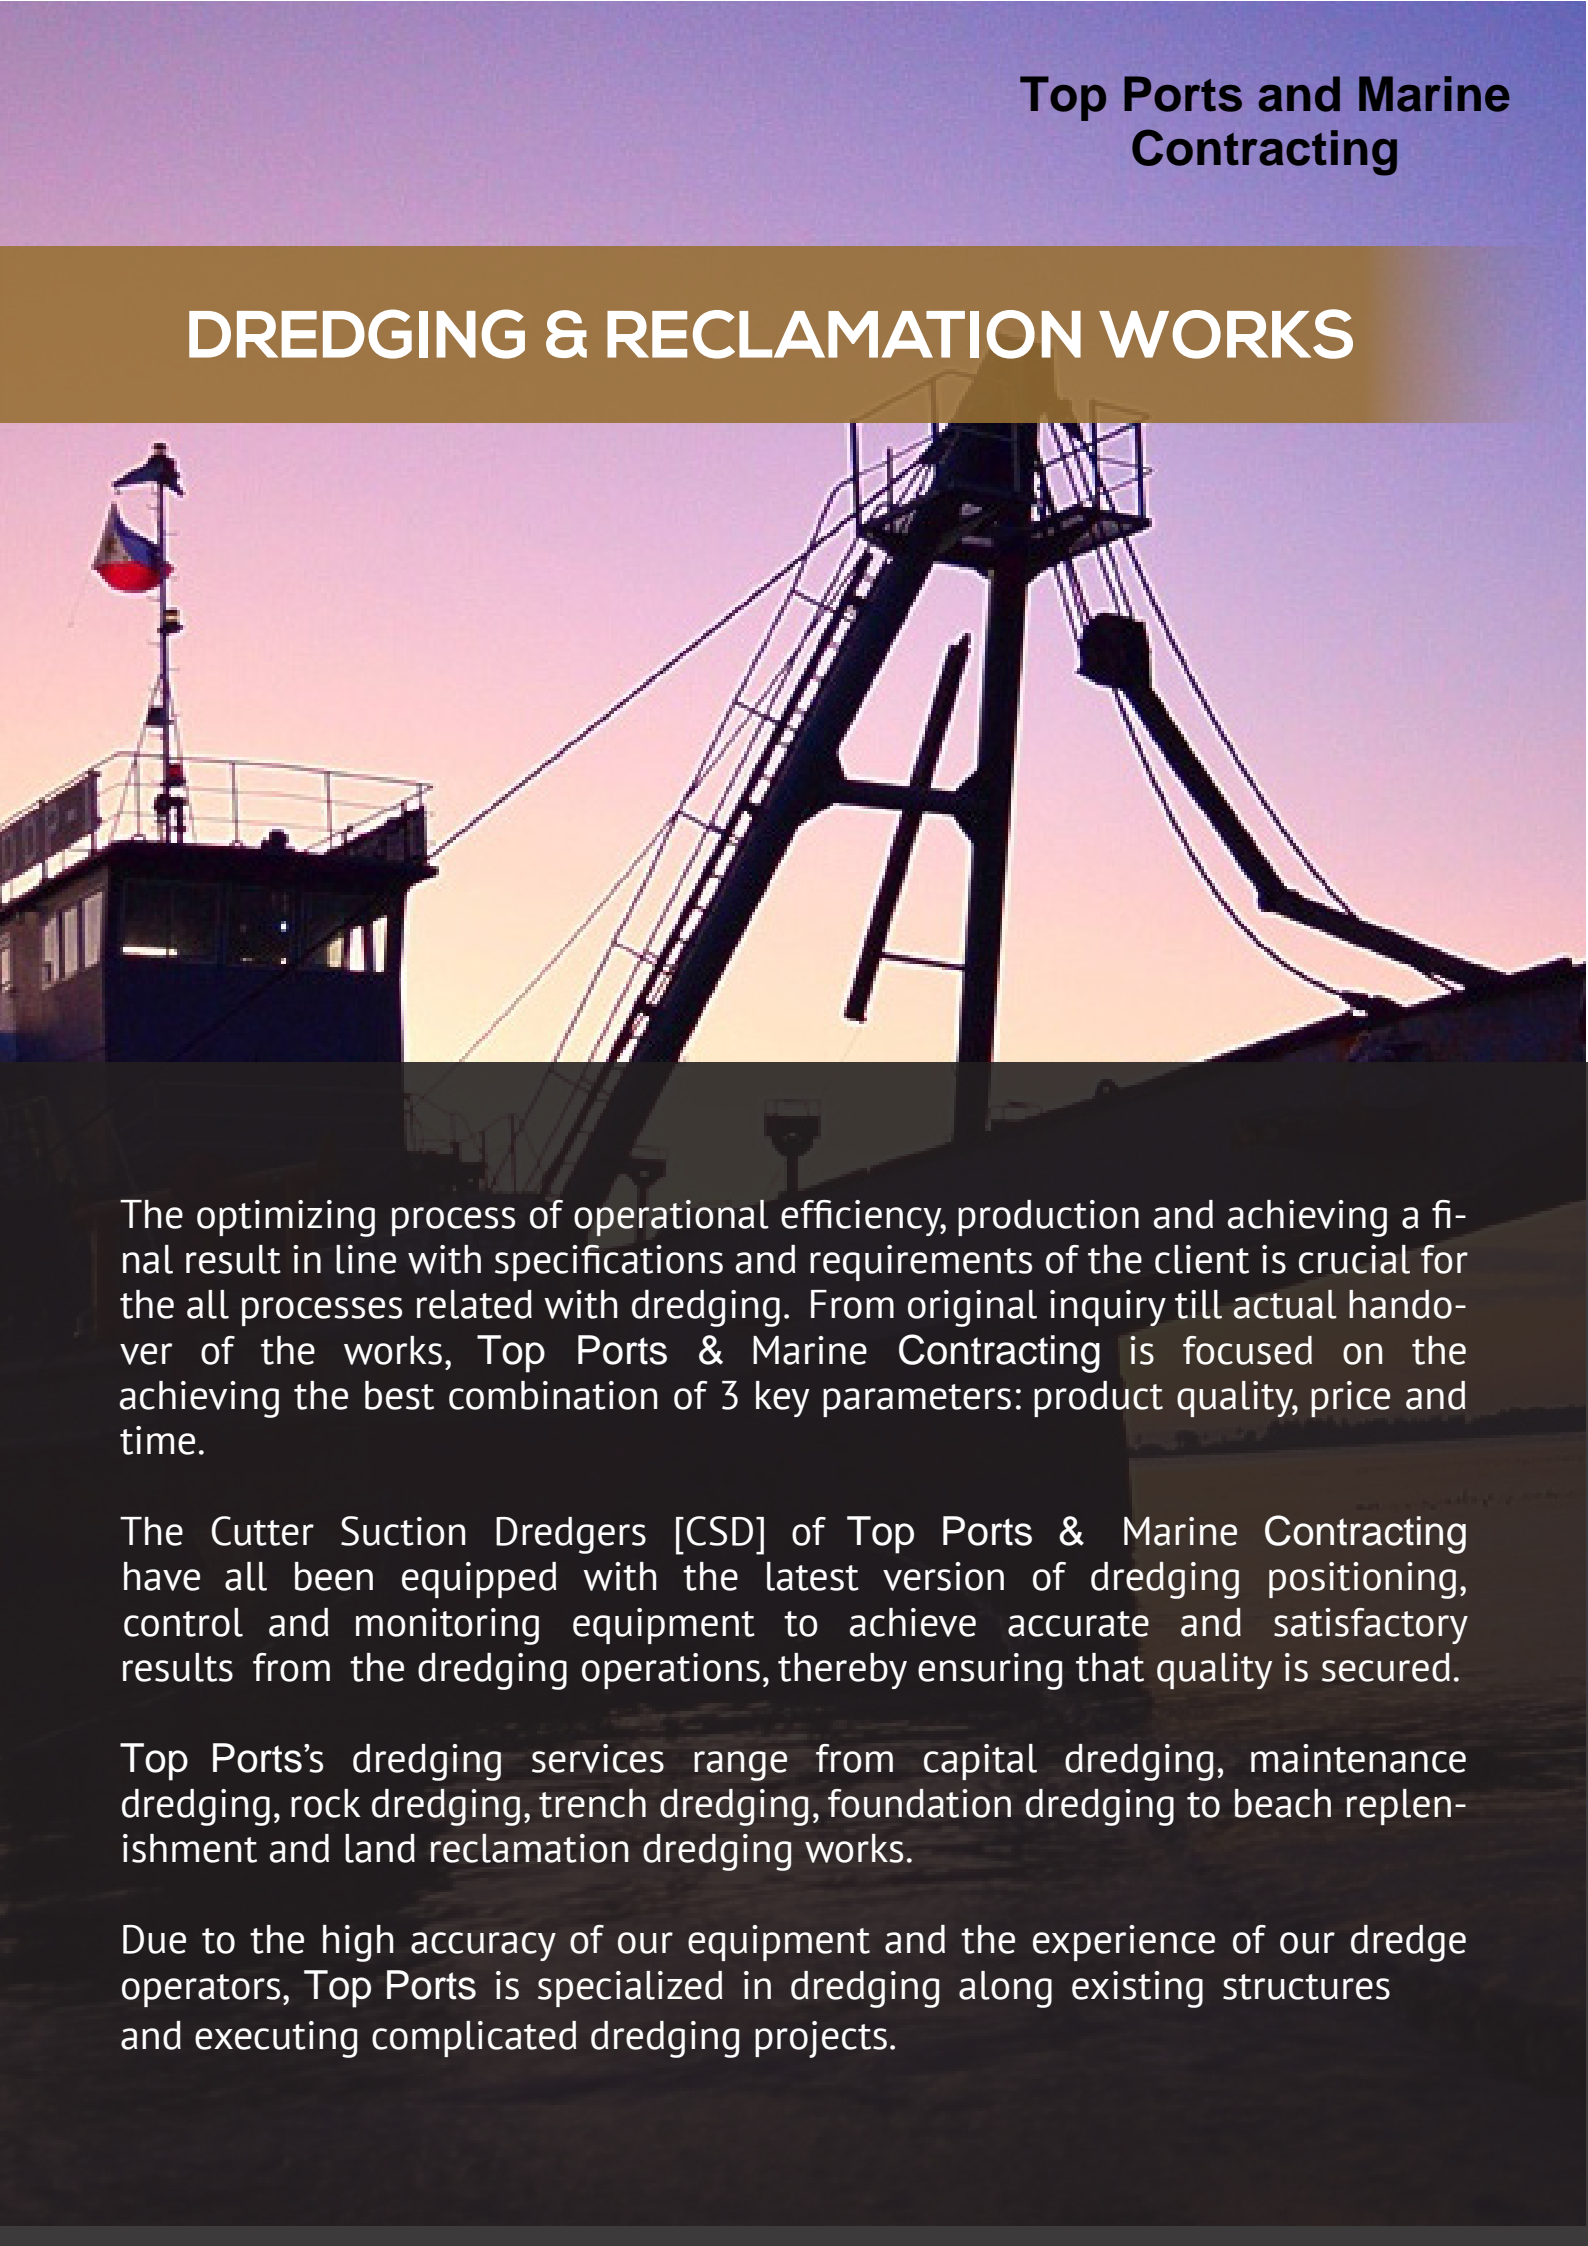

Top Ports has 15 years of expertise with many innovative projects that have shaped the UAE's Marine Infrastructure. Our ethos is to add maximum value to clients by ensuring timely project delivery with High Quality Standards

### Key Services

- Dredging and Reclamation Works
- Beach Nourishment
- Construction of Break Water
- Marine Construction
- Marine and Land Earth Works
- Bulk Excavation
- Marine Transportation

## DREDGING & RECLAMATION WORKS

The background image is a silhouette of a dredging vessel's crane and control cabin against a sunset sky. The crane is a large, lattice-structured boom extending from the vessel. The control cabin is a small, box-like structure with windows, located on the left side of the crane. The sky is a gradient of colors from purple at the top to orange and yellow near the horizon. The vessel itself is dark and mostly in silhouette.

The optimizing process of operational efficiency, production and achieving a final result in line with specifications and requirements of the client is crucial for the all processes related with dredging. From original inquiry till actual handover of the works, Top Ports & Marine Contracting is focused on the achieving the best combination of 3 key parameters: product quality, price and time.

The Cutter Suction Dredgers [CSD] of Top Ports & Marine Contracting have all been equipped with the latest version of dredging positioning, control and monitoring equipment to achieve accurate and satisfactory results from the dredging operations, thereby ensuring that quality is secured.

Top Ports's dredging services range from capital dredging, maintenance dredging, rock dredging, trench dredging, foundation dredging to beach replenishment and land reclamation dredging works.

Due to the high accuracy of our equipment and the experience of our dredge operators, Top Ports is specialized in dredging along existing structures and executing complicated dredging projects.

# MARINE CONSTRUCTION

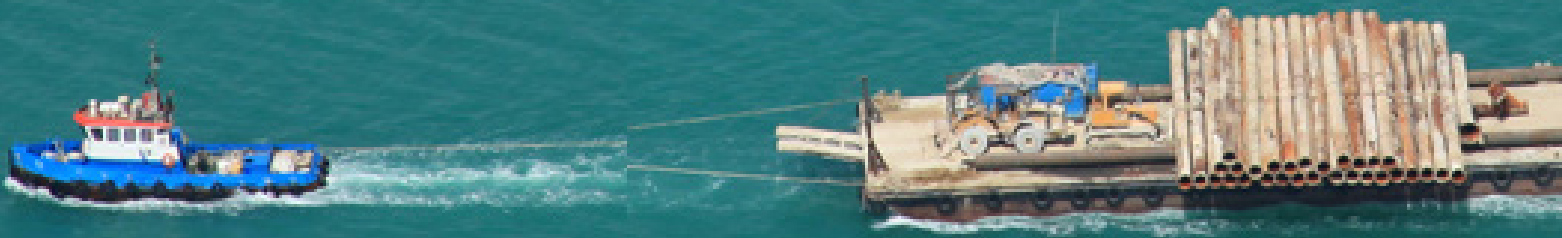

Top Ports & Marine Contracting (TPMC), from the year 2010 diversified its in-house capabilities into Marine construction.

Since then have been awarded and successfully commissioned a number of prestigious projects, involved dredging and reclamation, harbor construction using gravity quay walls in dry and in wet, rock breakwaters, rock protection works and concrete armor protection works.

harbors involves a lot more than just building in water. We conduct detailed technical and financial feasibility studies for each project and are also able to assess a project's environmental impact.

Besides Contracting harbors, we can also take care of recurring maintenance, something we can start taking into account during the construction process.

## MARINE LOGISTICS

Top Ports & Marine Contracting's Logistics provide a wide array of Marine Logistics Services. Project Logistics: transportation of various project cargoes, movement of materials and equipment from source to destination.

Marine Logistics & offshore support services: TPMC owns and operates a diversified fleet that include; tugboats, multcats, crew boat and land-ing crafts.

## SURVEY

Surveys are an important activity that occur, prior to, during and post execution of all projects. TPMC's strength lies in its experienced engineering and survey department that can execute all types of surveys which include:

Preparing proposal drawings, estimating the bill of material for tenders, etc, prior to the start of a project. It also includes executing daily progress surveys for the dredgers and sand fill, and monthly interim surveys for progressive payment claims during the stages of project execution.

The final and hand-over surveys to the satisfaction of the client that the project carried out is in conformity to the approved design, and is ready for the settlement of the final payment claims.

## TECHNICAL PROFICIENCY

Top Ports maintains a portfolio of in-house equipment, including over Six (6) Cutter Suction Dredgers, One (1) Trailing Suction Hopper dredger, One (1) Multi Cat and other equipments such as Landing Craft, Amphibious Excavators, Bull Dozers, Loaders, Graders, Dump Trucks, Water Tankers etc. This allows the organization to use its own assets for project completion.

Simultaneously, Top Ports has invested in a Quality, Environment, Health and Safety (QEHS) Integrated Management System under the directives of the ISO 19001, 14001 and OHSAS 18001 Certifications.

This ensures that Top Ports & Marine Contracting can generate consistent excellence and can track customer, corporate and legislative requirements to constantly improve project execution.

## EXPERTISE

Top Ports & Marine Contracting has worked on a varied number of large scale projects, each presenting their own requirements, challenges and necessary responses. This has allowed the organization to build an accumulation of knowledge and expertise that

- a) Facilitates accurate scheduling and timeline estimation
- b) Improves project management by allowing TPMC in identifying potential bottlenecks.
- c) Reduces response times by enabling the organization to identify possible contingencies and create mitigation plans in advance.

## KEY CLIENTS

Top Ports is proud to have worked with outstanding partners and clients in the United Arab Emirates. Some of the most notable clients in the industry include the following:

- Private Affairs Office of H.H Sheikh Mansour Bin Zayed Al Nahyan
- Zaya Development LLC
- Ghantoot Transport and General Contracting
- Command of Military Works
- National Marine Dredging Company

Zāya

GHANTOOT GROUP

## PROJECT EXECUTION

Prior to commencement of works on any project site, a detailed Method Statement is discussed, agreed and formalized with the client/ contractor. This Method Statement summarizes Top Ports & Marine Contracting's procedures of project execution.

Proposed dredge and fill plans, pipeline routes, storage facilities, discharge routes, surveying and reporting methodology, safety, quality and environmental assurance routines, etc., are outlined and described so that the concerned authorities are aware of our activities well ahead of the actual commencement of these works.

Thus, by mutual co-operation amongst the various parties, we endeavor to avoid conflicts, which would hinder timely project execution. This also minimizes unexpected delays and costs that could occur during the works.

By means of monitoring the progress, reporting to the client and subsequent discussions and meetings we receive feedback, which improves knowledge about the needs, expectations and deliverables. Actual progress on all elements of the project is carefully monitored and compared with original planning and schedule.

By means of daily, weekly and monthly reporting the client is informed and feedback from the client on methods and quality of the produced works is actively promoted. Feedback, both positive and negative, is reviewed carefully and is used in for our

internal review of procedures and methods of operation. This process of testing of appropriateness of our internal procedures and working methods versus client requirements and preferences promotes an improved level of quality and client satisfaction without an increased requirement for rework by us

With regard to site management, the related project tasks are pre-planned and discussed with the concerned personnel to maximize project efficiency. From the preliminary drawings and mobilization, project execution, to the final demobilization and clearing of site, teamwork and subsequent coordination between all involved is emphasized.

The method statements, meetings, progress reporting, project correspondence in combination with Top Ports & Marine Contracting's quality management system and its procedures, provide a frame work of information allowing for trace-ability of project elements as well as feedback for further guidance and customer focus.

Top Ports & Marine Contracting's project managers are dedicated to their projects and take the full responsibility on all quality, safety and environmental related actions that are to be executed on a project. They will also actively support the modern way of green and safe thinking amongst all other Top Ports & Marine Contracting employees, their sub-contractors and their clients.

## RESOURCE AND ASSETS

Top Ports & Marine Contracting (TPMC) is a company specializing in maritime and port infrastructure projects. Their resources and assets typically include:

**Marine Vessels:** A fleet of specialized vessels such as Dredgers, tugboats, barges, and support ships for marine construction and transportation.

**Heavy Equipment:** Cranes, excavators, loaders, and other equipment for port and marine construction work.

**Skilled Workforce:** A team of engineers, project managers, marine specialists, and skilled labor with expertise in port construction and marine engineering.

**Materials:** Access to construction materials like concrete, steel, and piling equipment essential for marine infrastructure projects.

**Technological Tools:** Advanced surveying and design software, as well as navigation and communication equipment for project coordination.

**Logistics Network:** Partnerships for efficient material supply chains and transportation logistics to support large-scale projects.

These assets enable TPMC to execute complex marine and port construction projects efficiently.

# PERSONNEL

Top Ports & Marine Contracting's key personnel are backed by an experienced technical and operational workforce. Additional personnel are acquired as needed and in accordance with contract circumstances and any special requirements of the client. It has been common for such additional personnel to rejoin the company on several occasions.

All of our operation employees have received appropriate discipline orientated training towards maintenance and improvement of our Quality Management System. We are very proud that all operational divisions within the organization are included and satisfactory maintained in our accredited quality system.

All employees are equipped with appropriate physical and mental tools for their respective trade, such as: Personnel Protective Equipment, First Aid Training and Safety Awareness Training. Our key technical staff (support yard and on site) is undergoing regular engineering training and advice from manufacturers in our ongoing process towards achieving optimum technical

efficiency, and to improve maintenance effectiveness. Furthermore, all our marine oriented employees have been trained and satisfactory examined to international STCW examination standards. We are constantly in the process of maintaining and superseding all ministerial endorsements and other administrative requirements for all relevant crew members.

Top Ports & Marine Contracting is tracking on an individual basis the training requirements and results by means of yearly evaluation of all personnel. The deployed (limited) multitasking approach allows employees to acquire first-hand experience and experience and appreciation in various disciplines. To achieve effective utilization of the plant our marine crew is trained specifically for our plant by internationally accepted training institutes.

By ongoing training at all levels of the organization the self-sufficiency, and therefore the ability to provide a better quality product, of each discipline within the organization will improve.

## RESOURCES

It is important for any contracting company to be well equipped with apt resources and to be able to meet the challenges of diverse projects. Subject to client requirements, site conditions and other project factors, the allocated and available resources, be it human or equipment, should enable the contractor to execute his/her project with time and cost effective means.

Arising from the successful execution of a number of major dredging and reclamation projects, interspersed with numerous minor works, Top Ports & Marine Construction enjoys substantial resources - Human and Plant (equipment), in its own right. In addition, its two capital shareholders, place considerable opportunity and resources at its disposal.

Backed by these resources, Top Ports & Marine Contracting is well established to execute projects whenever and wherever required. Top Ports & Marine Contracting owns modern dredgers and associated equipments. The Company is proud that in addition to the existing fleet, a new dredgers was constructed and commissioned in the first quarter of 2015 to expand core business and increase market opportunities.

Furthermore several new marine support vessels and land based equipment have been added to the fleet in the recent years.

## HSE AND QUALITY CONTROL

**SAFETY  
FIRST**

Top Ports realizes its employees are its greatest asset, and do not compromise on their safety in any step of the project life cycle.

The organization's commitment to health safety is demonstrated by its successful implementation of its Quality, Environment, Health and Safety Integrated Management System under the directives of the ISO 9001, 14001 and OHSAS 45001 certifications. The system enables Top Ports to track incidents and appropriate responses, and document customer, corporate and legislative requirements.
